How to Choose Jewelry Based on your Skin Tone

1. Identify your skin tone

COOL

The color of the veins on the inside of your arm look blue or purple, and your skin turns red and burns when exposed to the sun.

WARM

The color of the veins on the inside of your arm look greenish, and you get tanned very easily but your skin doesn't burn.

NEUTRAL

If you cannot determine the color of the veins on the inside of your arm, look either green or blue.

2. Choose the color of the Metal

COOL

Opt for light metals like silver, platinum and white gold.

WARM

Opt for gold, rose gold, copper and brass.

NEUTRAL

Anything goes! You have the best of both worlds.

3. Select the color of your gemstone
